KORE

2013

KORE has been long established in the mountain bike industry, laying our roots in 1981. Over these 30+ years we have been proud to provide the sport with many initiative products for both high end racers and every day leisure riders alike. In years gone by we have seen such riders as John Tomac, Shawn Palmer, Nicolas Vouilloz, Steve Peat, Alison Sydor, Brian Lopes, Michal Prokop, Jill Kintner and many more all riding KORE components helping us to shape the company to where we are today, and 2012 was no different with sponsored athletes all around the world flying the KORE flag. Throughout 2012 we worked closely with our athletes to further refine our product range for the coming years.

For 2013 we have made many changes to the range with the introduction of new stems, bars, grips, pedals, an all new rim program and graphics updates to some of the longer standing products. We have big plans for the coming years and products to match, whether your preferred riding is cross country, dirt jumping, trail, all mountain, enduro or downhill we have something for you. Thanks for looking and remember to keep it KORE.

M35 BAR DIAMETER SETTING A NEW STANDARD

While 31.8 bar size is a standard here at KORE it has become apparent that in recent times with bars getting wider a change or upgrade has been needed to compensate ... so we introduce the 35mm bar clamp size. With the increase in size from 31.8 to 35mm we are able to offer a product that is stronger, stiffer and lighter which made it a simple decision for us to move forward as we can now offer 10% lighter bars that outperform 31.8 bars by up to 20% in overall strength and fatigue tests. To get things started for 2013 we will be offering our Repute stem and OCD bar in 35mm size. In summary, for guys taking big hits who like to run wide bars M35 is for you!

MEET THE FAMILY

With years of experience in all genres of mountain biking, our product engineers have given KORE the best products for all disciplines. Lightweight for faster rides, wide bars for extra control and stability, extra width stem face plates for added stiffness and updated graphics to keep you looking cool. With 5 family groups that specialize in specific areas – *we have you covered!*

MEGA

With the ever growing trend of mass start downhill races and long distance stage race downhills our Mega range is primarily aimed at the enduro market, super light weight yet strong enough for those knarly descents. These parts bridge the gap between cross country and downhill perfectly allowing you to tailor your bike to the right strength to weight ratio required for your riding style.

RIVERA

Dirt jump, street, skate park, slope style or for any aggressive hard tail Rivera parts are solid and reliable yet light enough for even the highest level rider. BMX inspired angles and rises with attention to the finer details needed for this type of riding. A range of cool colours will also make sure that your bike looks bling while out and about.

DUROX

With all mountain riding in mind our Durox parts are designed to do it all and are intended to be ridden on all-day rides that involving steep climbs and steep descents. If you're heading into the back country you want to be sure that your parts are going to hold up no matter what so choose and ride with confidence!

XCD

High end to entry level with choices of carbon or alloy, XCD parts have an option whether you are cross country racing or recreational trail riding. Bringing lightweight and efficiency, Those long endurance races or long days out on the trail will be more enjoyable. Extra wide riser bars and super light rims and wheelset for 26" or 29er blazers.

TORSION

Various parts fall into the Torsion category although the names may differ just like a step child; Repute and OCD are 2 that spring to mind. For the extreme gravity riders, downhill racers or all out freeriders something in this group will turn you on and getting you going. Extra wide bars, bomb proof rims and just about everything in between to give you a solid reliable ride for going big and fast.

OCD

AL7050-T6 Triple Butted
 31.8 or new M35 Bar Clamp Diameters

 Weight - 126g / 35mm, 163g / 50mm, 165g / M35 50mm

GRIPS

IKON LOCK ON

Nylon/Kraton Rubber
Alloy Lock On Ends With 3mm Hardware
Raised Ikon Design For Added Feel And Anti Slip
Narrow Profile
135mm Length
Plastic End Caps
Black, White Or Grey
Weight - 104g (Pair)

IKON

Nylon/Kraton Rubber
Raised Ikon Design For Added Feel And Anti Slip
Narrow Profile With Closed Ends
135mm Length
Black, White Or Grey
Weight - 90g (Pair)

RIVERA LOCK ON

Super Soft Pruven Kraton Single Density Rubber
Alloy Lock On Rings with 1 pc Alloy End Caps
Angled Mushroom Design Helps Prevent Mud Build Up
Medium Profile
130mm Length
Black With Choice Of Red, Blue Or Gold Ends
Weight - 112g (Pair)

RIVERA MX

Super Soft Pruven Kraton Single Density Rubber
BMX Style With Flange
Angled Mushroom Design Helps Prevent Mud Build Up
KORE Thermo End Plugs
135mm
Black, Grey, White, Red, Blue, Green
Weight - 137g (Pair)

PEDALS

TORSION SX V2

AL6061-T6 Extruded With Post CNC
Concaved Body With 48 Replaceable 6mm Pins
Cr-Mo 9/16" Axle
Sealed Bearings
Black Or Silver
Weight - 426g (Pair)

RIVERA THERMO

Durable Nylon Compound body
Borbon Steel 9/16" Axle
Loose Ball Bearing Type
Black, Grey, White, Red, Blue, Green
Weight - 308g (Pair)

SADDLES

FAZER SL

Hollow 7mm Cr-Mo Rails
12mm Light Foam
EA Pressure Release System Base
Synthetic Cover With Kevlar Corners
Embossed And Printed Graphics And Logos
Black/ Grey Or White/ Grey Options
Dimensions - 265mm x 135mm
Weight - 250g

FAZER Ti

Titanium Rails
12mm Super Light Foam
EA Pressure Release System Base
Microfiber Cover With
Under Stitched Kevlar Corners
Embossed And Printed Graphics And Logos
Black/ White Or White/ Black Options
Dimensions - 265mm x 135mm
Weight - 221g
